

May 11, 2011

Dear Building Systems Valued Customer:

Effective immediately, references to the **Corr-Stops® CI** name will no longer be valid or supported by BASF. In accordance with our product obsolescence program, all materials referencing this product must be discontinued immediately and all website links updated to reference our **Emaco® CP Intact Galvanic Anodes** instead of Corr-Stops.

The link on the Building Systems website for Emaco CP Intact Galvanic Anodes is as follows:

http://www.buildingsystems.basf.com/p02/USWeb-Internet/buildingsystems/en_GB/content/microsites/buildingsystems/products/items/Emaco_CP_Intact_Galvanic_Anodes

Please note that several Building Systems technical data guides have also been updated to remove the reference to Corr-Stops. Affected data guides include:

- Emaco® S66 CI
- Emaco® S77 CI
- Emaco® S88 CI
- Emaco® R300
- Masterpatch® 240 CR

For the most current version of Building Systems' data guides, please consult our website: www.buildingsystems.basf.com.

Thank you in advance for your attention to this matter. If you have any questions or concerns regarding this change, please do not hesitate to contact your Territory Sales Manager or Key Account Manager.

Sincerely,

Bill McCann
Product Marketing Specialist
Corrosion Mitigation
